

AWS S3 Multi Part Upload: -

Summary: -

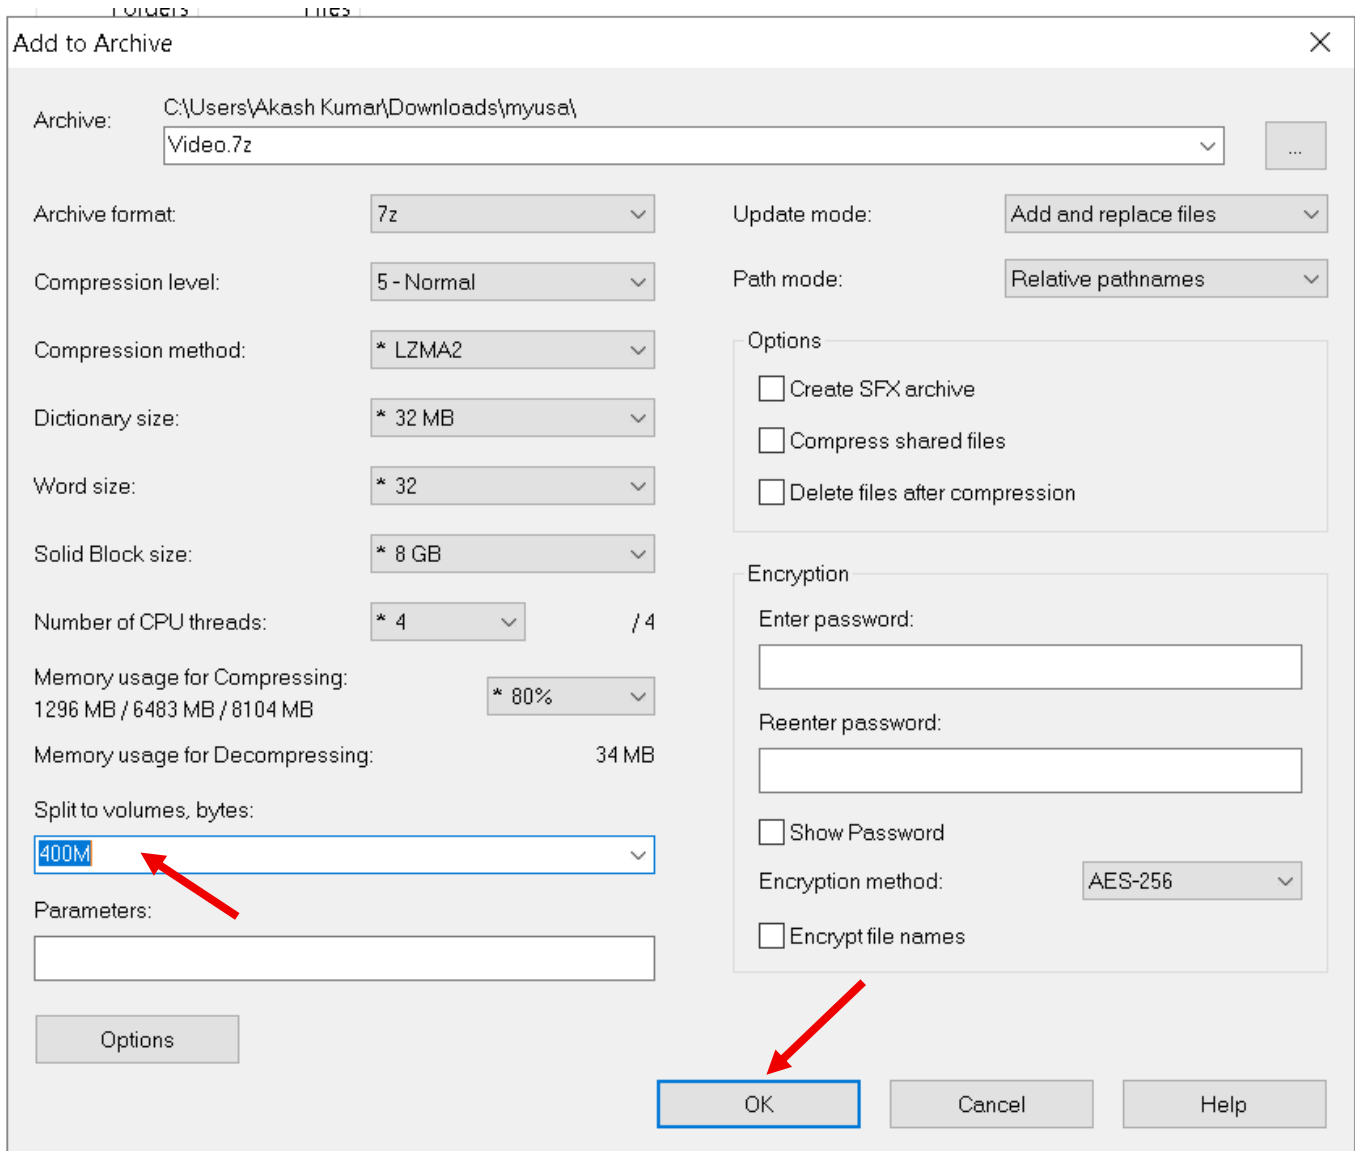

In this lab, I performed AWS S3 Multipart Upload to upload large files by splitting them into smaller parts. First, I used the 7-Zip tool to divide a large video file into multiple partitions. Then, I created an S3 bucket and configured AWS CLI using access keys and region details. After that, I initiated the multipart upload process using AWS CLI commands, uploaded each file part separately, and noted the ETag values for every uploaded part. Finally, I verified the uploaded parts, completed the multipart upload using a JSON file, and confirmed that the large file was successfully uploaded to the S3 bucket.

Let's Start: -

- Multi part upload means Upload large files by breaking them into smaller parts.
- Like we can store multiple things in our S3 Bucket.
- But if we try to upload a file more 5GB in size it creates problem.
- Because in AWS S3 we can store less than 5GB size file at a time.
- So see how we can do this.
- Firstly you need a tool 7Zip.
- Download and install in it your system.
- Now open it.

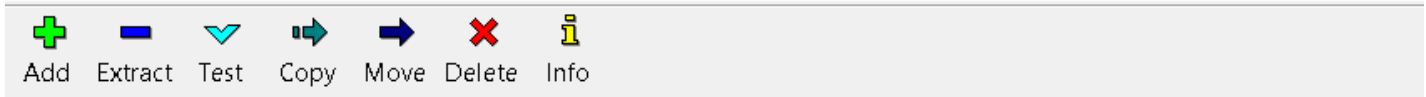

- Now select File and click this icon + at top

- Now select the split Volume.
- And click Ok.

File Edit View Favorites Tools Help

C:\Users\Akash Kumar\Downloads\myusa\						
Name	Size	Modified	Created	Comment	Folders	Files
Video.7z.001	419 430 400	2026-05-22...	2026-05-22...	}		
Video.7z.002	419 430 400	2026-05-22...	2026-05-22...			
Video.7z.003	62 741 677	2026-05-22...	2026-05-22...			
Video.mkv	906 884 377	2026-04-08...	2026-05-22...			

- Now we have three partitions of our file.
- Now we need to create a bucket.

my-us-bucket23 [Info](#)

[Objects](#) [Metadata](#) [Properties](#) [Permissions](#) [Metrics](#) [Management](#) [File systems - new](#) [Access Points](#)

Objects (0)
[Refresh](#) [Copy S3 URI](#) [Copy URL](#) [Download](#) [Open](#) [Delete](#) [Actions](#) [Create folder](#) [Upload](#)
Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant them permissions. [Learn more](#)

Name	Type	Last modified	Size	Storage class
------	------	---------------	------	---------------

No objects
You don't have any objects in this bucket.

[Upload](#)

- Now bucket is created.
- Now open your CMD in your System.

```
C:\Users\Akash Kumar>aws configure
AWS Access Key ID [*****VV2U]:
AWS Secret Access Key [*****R6vY]:
Default region name [ap-south-1]:
Default output format [json]:
```

- Now Enter aws configure and Enter Access Key, Secret Access Key, region.
- And simply press Enter.

```
Command Prompt
C:\Users\Akash Kumar>cd downloads
C:\Users\Akash Kumar\Downloads>cd myusa
C:\Users\Akash Kumar\Downloads\myusa>aws s3api create-multipart-upload --bucket my-us-bucket23 --key video
{
  "ServerSideEncryption": "AES256",
  "Bucket": "my-us-bucket23",
  "Key": "video",
  "UploadId": "B8f34Svw9V9C7B.Y6dqGxUmFYQvh1nI6tKTlqrCjusuQgcWjDp8ZhkGBx5BKJxGu6Tu0rxHdJ3dQdmu7CigzDEvM1R2EyYsXpQT8PaMxiGCZglIZq.wCY0KXCdDAUGsR"
}
C:\Users\Akash Kumar\Downloads\myusa>
```

- So, firstly go where your file is located and then Enter.
- `aws s3api create-multipart-upload --bucket {Bucket name} --key video`
- then it gives you upload id copy this and save in notes.

```
C:\Users\Akash Kumar\Downloads\myusa>aws s3api upload-part --bucket my-us-bucket23 --key video --part-number 1 --body .\Video.7z.001 --upload-id "_2LGpGeole0lg_veo5SQAmkANhHeg8u3ChfW8pV_HUqXqFPU2K5osYu316TOoAIuY8Z_pzmnaVTrlqVQvqLbqYpwfaDIxB_hrcM9m6Yk8GJDcNSLMzb000bY0cQgQaT"
{
  "ServerSideEncryption": "AES256",
  "ETag": "\"0bc74be815f403b8a26633e92abd5e18\"",
  "ChecksumCRC64NVME": "6cvr13whDkM="
}
C:\Users\Akash Kumar\Downloads\myusa>
```

- Enter `aws s3api upload-part --bucket your-bucket-name --key your-large-file --part-number 1 --body .\yourfile.zip.001 --upload-id`

- Edit the code according to you like bucket name, part number, file name and upload id.
- our first part is uploaded.
- Now note the ETag of part one

```
C:\Users\Akash Kumar\Downloads\myusa>aws s3api upload-part --bucket my-us-bucket23 --key v
ideo --part-number 2 --body .\Video.7z.002 --upload-id "_2LGpGeole0lg_veo5SQAmkANhHeg8u3cH
fW8pV_HUqXqFPU2K5osYu316TOoAIuY8Z_pzmnaVTr1qVQvqqLbqYpwfaDIXB_hrcM9m6Yk8GJDcNSLMzb00bY0cQ
gQaT"
{
  "ServerSideEncryption": "AES256",
  "ETag": "\"8ebd6c5699025dcecc36391f20b7b39e\"",
  "ChecksumCRC64NVME": "fVijMeT8dN0="
}

C:\Users\Akash Kumar\Downloads\myusa>
```

- Similarly we upload our 2nd part change part number and file name.
- Note the ETag of part 2 in notes.

```
C:\Users\Akash Kumar\Downloads\myusa>aws s3api upload-part --bucket my-us-bucket23 --key v
ideo --part-number 3 --body .\Video.7z.003 --upload-id "_2LGpGeole0lg_veo5SQAmkANhHeg8u3cH
fW8pV_HUqXqFPU2K5osYu316TOoAIuY8Z_pzmnaVTr1qVQvqqLbqYpwfaDIXB_hrcM9m6Yk8GJDcNSLMzb00bY0cQ
gQaT"
{
  "ServerSideEncryption": "AES256",
  "ETag": "\"4fbc4decf381b9ee68b206278694a4c4\"",
  "ChecksumCRC64NVME": "RbKgMDpy/nw="
}

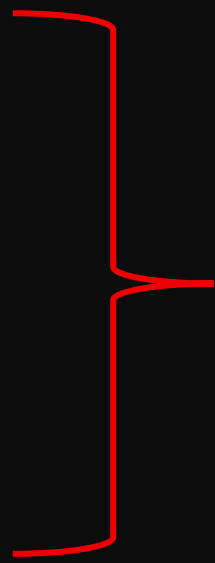

C:\Users\Akash Kumar\Downloads\myusa>
```

- Now third part is ready note the ETag.
- Now List Uploaded Parts to Verify.

```

C:\Users\Akash Kumar\Downloads\myusa>aws s3api list-parts --bucket my-us-bucket23 --key video --upload-id "_2LGpGeole0lg_veo5SQAmkANhHeg8u3cHfW8pV_HUqXqFPU2K5osYu316TOoAIuY8Z_pzmnaVTrlqVQvqqLbqYpwfaDIXB_hrcM9m6Yk8GJDcNSLMzb000bY0cQgQaT"
{
  "Parts": [
    {
      "PartNumber": 1,
      "LastModified": "2026-05-22T12:47:50+00:00",
      "ETag": "\"0bc74be815f403b8a26633e92abd5e18\"",
      "Size": 419430400
    },
    {
      "PartNumber": 2,
      "LastModified": "2026-05-22T12:56:07+00:00",
      "ETag": "\"8ebd6c5699025dcecc36391f20b7b39e\"",
      "Size": 419430400
    },
    {
      "PartNumber": 3,
      "LastModified": "2026-05-22T13:01:39+00:00",
      "ETag": "\"4fbc4decf381b9ee68b206278694a4c4\"",
      "Size": 62741677
    }
  ]
}

```

- aws s3api list-parts --bucket your-bucket-name --key your-large-file --upload-id
- now we need to create one json file in note pad provided in resource.

```

C:\Users\Akash Kumar\Downloads\myusa>aws s3api complete-multipart-upload --bucket my-us-bucket23 --key video --upload-id "_2LGpGeole0lg_veo5SQAmkANhHeg8u3cHfW8pV_HUqXqFPU2K5osYu316TOoAIuY8Z_pzmnaVTrlqVQvqqLbqYpwfaDIXB_hrcM9m6Yk8GJDcNSLMzb000bY0cQgQaT" --multipart-upload file://myparts.json
{
  "ServerSideEncryption": "AES256",
  "Location": "https://my-us-bucket23.s3.us-east-1.amazonaws.com/video",
  "Bucket": "my-us-bucket23",
  "Key": "video",
  "ETag": "\"8e1fe23b62e73687fbee11b0d4e46ae2-3\"",
  "ChecksumCRC64NVME": "n2/f9U+DHUM=",
  "ChecksumType": "FULL_OBJECT"
}

C:\Users\Akash Kumar\Downloads\myusa>_

```

- aws s3api complete-multipart-upload --bucket your-bucket-name --key your-large-file --upload-id --multipart-upload [file://C:\path\to\parts.json](#)
- now we uploaded successfully.
- Now go to your bucket your file is uploaded successfully.
