

Configuring an AWS Transit Gateway

To Begin with the Lab

Summary of the Lab

Note: This lab assumes that three VPCs have already been created. **VPC-A** contains one public subnet (for the Jump Host) and one private subnet, while **VPC-B** and **VPC-C** each contain one private subnet. The EC2 instances and security groups are already configured. The objective of this lab is to connect all three VPCs using an **AWS Transit Gateway**.

- Create 3 VPCs (same Region, e.g., us-east-1): **cf-vpc-A** (10.0.0.0/16), **cf-vpc-B** (10.1.0.0/16), **cf-vpc-C** (10.2.0.0/16).

Your VPCs

Firewall (security group)

New security group

- three **private EC2 instances**—one each in the **private subnets of cf-vpc-A, cf-vpc-B, and cf-vpc-C**—to test connectivity through the Transit Gateway.

- Navigate to **Transit Gateways** in the VPC console.
- Click **Create Transit Gateway**.

- Provide a meaningful name such as **cf-vpc-a-b-c**.

- Leave all other settings as their default values.
- Click **Create Transit Gateway** and wait until its status changes to **Available**.

- Open the **Transit Gateway Attachments** page.

- Click **Create Transit Gateway Attachment**.

- Select the Transit Gateway that was created in the previous step.
- Choose **VPC** as the attachment type.

Create transit gateway attachment [Info](#)

A transit gateway (TGW) is a network transit hub that interconnects attachments (VPCs and VPNs) within the same AWS account or across AWS accounts.

Details

Name tag - optional
Creates a tag with the key set to Name and the value set to the specified string.

cf-tgw-attachment

Transit gateway ID [Info](#)
tgw-08b8bd886cb7b99b7

Attachment type [Info](#)
VPC

- Select **cf-vpc-A**.
- Choose the **Private Subnet** of **cf-vpc-A** for the attachment.
- Click **Create Attachment**.

VPC attachment
Select and configure your VPC attachment.

☒ DNS support [Info](#)

☐ Appliance Mode support [Info](#)

VPC ID
Select the VPC to attach to the transit gateway.

vpc-01a6a3e3b5712e37e

Subnet IDs [Info](#)
Select the subnets in which to create the transit gateway VPC attachment.

☒ us-east-1a subnet-0e6c32039a3b0a1c2

☐ us-east-1b No subnet available

- Repeat the same process for **cf-vpc-B** and **cf-vpc-C**.

You successfully created VPC attachment tgw-attach-013fdf2d026503b3a / cf-tgw-attachment-c.

Transit gateway attachments (3) [Info](#)

Find transit gateway attachment by attribute or tag

	Name	Transit ...	Transit ...	State	Resource ty...	Resource ID	Association route table ID
☐	cf-tgw-attachment-c	tgw-attach...	tgw-08b8b...	Pending	VPC	vpc-065ac0e918fd69d07	-
☐	cf-tgw-attachment-b	tgw-attach...	tgw-08b8b...	Pending	VPC	vpc-0ded0ba4d08f9898a	-
☐	cf-tgw-attachment-a	tgw-attach...	tgw-08b8b...	Available	VPC	vpc-01a6a3e3b5712e37e	tgw-rtb-04a14c0ece1a004d2

- Open the **Transit Gateway Route Tables** section.
- Select the default route table that was automatically created with the Transit Gateway.
- Open the **Associations**, **Propagations**, and **Routes** tabs.
- Verify that all three VPC attachments are automatically associated and that the CIDR blocks of all three VPCs have been propagated into the Transit Gateway Route Table.

Transit gateway route tables: tgw-rtb-04a14c0ece1a004d2
